Ben,

Joy just provided a fact sheet for USOR-I will forward it. Also I believe Grants Uranium/Jackpile may be of concern. I am on travel today, but should be able to work this afternoon/evening if you need anything from me.

Cathy/Susan/Carlos - Please **provide summaries of the sites (NPL and non-NPL) in Region 6 that have high visibility community/EJ issues in the states (AR, LA, OK, NM) represented by Committee members. The summaries should focus on**

the community concerns and how EPA is engaging the community and how we are addressing the concerns. Summaries are due to Connie and Ragan by COB Wed 12/12 so please start immediately preparing them. We can meet to discuss further if there are questions. Thanks.....jcp

The Senate Environment and Public Works Committee is tentatively scheduled to hold a hearing on contaminated sites and community concerns/EJ issues the morning of Thursday, December 20. Mathy Stanislaus is expected to be EPA's witness. The NPL sites that Committee majority staff have mentioned regarding the hearing are Fort Ord (CA), Hunters Point (CA) and Ringwood (NJ). Staff plans to solicit members of the Committee for other sites to add to the list. The contaminated sites that end up being the focus of the hearing **may not all be NPL sites**. OSRTI needs to poll the regions and ask for them to **provide us summaries of the sites in their region that have high visibility community/EJ issues in the states represented by Committee members. The summaries should focus on the community concerns and how EPA is engaging the community and how we are addressing the concerns.** For instance, Max Baucus of Montana is a Committee member so I would expect Region 8 to identify Libby as a site with high visibility community and/or EJ concerns. We need to prepare Mathy to respond to Committee member questions regarding these high visibility community sites. We will need the summaries no later than Friday, December 14 (of course sooner is always appreciated). I have inserted names of the Committee members below. If you have any questions, please let me know. Thank you!
